Kali Linux 2.0 (Sana)

Now a rolling release, which means more frequent updates.

Restructured menus and tool categories.

Added screencasting so that you can record desktop and upload to YouTube/Vimeo etc.

The core set tools in Kali will be weekly updated.

Added desktop notifications, so that you don't miss anything.

Kali UI will now use [full Gnome Desktop](#) instead of gnome-fallback, i.e. more eye-candy for you.

Ruby 2.0 will be supported natively which will make [Metasploit](#) will load much much faster.

Added all new cutting-edge wireless penetration tools and more. Watch out neighbors, it will never be safe anymore.
