

# 10 Signs of Bad Crypto Projects

## Bad Tokenomics

- ⚡ Unfair distribution and allocation of the tokens
- ⚡ Unlimited max supply and/or inflationary tokens
- ⚡ No vision (or poor one) for the future distribution of the tokens

## Anonymous Projects

- ⚡ Unknown CEO, CTO, COO, ...
- ⚡ Unknown developers
- ⚡ Poor website with inaccurate and/or incomplete data

## Static Coins

- ⚡ No price movement for a long time
- ⚡ No reaction in bull runs or green days
- ⚡ No roadmap and vision

## Unsafe Projects

- ⚡ Close-source codes
- ⚡ Reported hacks/scams

## Pump & Dump Coins

- ⚡ Price movement without fundamentals supporting it
- ⚡ Majority of tokens owned by very few people
- ⚡ Supported and promoted mainly by celebrities or influencers

## Ponzi Scheme Projects

- ⚡ Pyramid structure for promotion
- ⚡ No real value other than speculation
- ⚡ Hidden or anonymous team behind

## "Promising" Coins

- ⚡ No real use cases and/or partnerships
- ⚡ Built on top of promises without delivery
- ⚡ No major events or big planned feature to release

## Centralized Tokens/ Networks

- ⚡ Limited nodes/miners
- ⚡ Central nodes having lots of influence on the whole network
- ⚡ Dependency on third-parties to govern token

## Projects under Investigation

- ⚡ Ongoing lawsuits
- ⚡ Reported scams or hacks

## Crazy Yield Percentages

- ⚡ Long lock-up periods
- ⚡ Insecure liquidity pools and exchanges
